

Desktop Virtualisation – It's Time to Make the Leap Get more efficiency, control & choice with Celerity, Taupo & IBM.

If you're looking to reduce IT costs and streamline operations across your company, minimise space requirements and cut power consumption – then this could be one of the most important seminars that you will attend all year.

Join IBM infrastructure specialist Celerity and Taupo VMware Consultancy on **Friday 26th February 2010, Stirling Management Centre** to find out how you can:

- Transform desktop management into a simplified & automated process.**
- Reduce the total cost of desktop ownership by 50%**
- Provide end users a consistent high performance desktop experience**
- Bring the power of the datacenter to your corporate desktop**

We will present the hardware challenges faced when virtualising the desktop and how these can be overcome with the versatile and scalable server technology from IBM - delivering to you a more manageable and more powerful IT environment.

You'll be one of the first people in the industry to understand new advancements in desktop Virtualisation throughout 2010 and will have IBM hardware specialists and certified VMware trainers and consultants on hand to answer any questions that you may have.

VMware View 4 is the industry's first purpose built solution for delivering desktops as a managed service.

To Register your place please email tracy.whittle@celerity-uk.com
